Contents

Original Articles

Effects of component placement on solder joint through-life reliability 327
RSH Yang, DR Broden, G-M Zhang and DM Harvey

Developing prevention reliability in hub location models 337
M Hamidi, M Gholamian and K Shahanaghi

Modeling and analysis of failure propagation of mechanical system with multi-operation states using high-level Petri net 347
J Wu, S Yan and RX Gao

Reliability analysis of underground pipelines with correlations between failure modes and random variables 362
KF Tee and LR Khan

A new fault tree analysis approach based on imprecise reliability model 371
Z Liu, Y-F Li, L-P He, Y-J Yang and H-Z Huang

Fault diagnosis and prognosis with partially observed stochastic Petri nets 382
D Lefebvre

Automated generation of mission reliability simulation model for space tracking, telemetry and control system by extensible markup language and extended object-oriented Petri net 397
X-s Yang, X-y Wu and X-y Wu

Discrimination of low- and high-demand modes of safety-instrumented systems based on probability of failure on demand adaptability 409
Y Liu

Combined bispectrum and trispectrum for faults diagnosis in rotating machines 419
A Yunusa-Kaltungo and JK Sinha

Life probability distribution model of mechanical components with the number of load application as life parameter 429
Z Wang and A-n Wang
